Football Draw Betting Guide

This is the official guide of the site <https://predictions.football> dedicated to betting on football draws.

The power of betting on result X is incredible and allows, when combined with the correct predictions and matches, to obtain significant advantages in terms of wins.

Our team specifically analyzes the games with a high probability of a draw and selects them on a dedicated page.

Recommended bet:

Final result X

The draw page is structured in a simple way. In fact, there are, day by day, all the matches selected by our team that could end in a draw.

How the system works.

The odds for a tie, with occasional exceptions, are usually quoted around 3 times the stakes, but usually 3.1 / 3.4.

So if I bet 1 on the tie, in case of correct result (X) I will have won 3 so I will have a net of +2.

The system we recommend is a combination of 9

games to be played on a single draw. So 1 on match 1 draw, 1 on match 2 draw, 1 on match 3 draw etc.

You can also play more games but we always recommend multiples of 3. For example 6 games or 9 or 12 etc.

You will immediately notice the power of the system. In fact, 2 draws out of 9 matches will be enough to recover almost the entire stake (we underline that the odds are usually greater than 3).

3 draws to go already profitable and > 3 draws to win really big.

Consider that the matches entered on our draw page

<https://www.predictions.football/football-draws-predictions/>

are selected with high probability of achievement.

We advise you to follow them in the order in which they appear in the table.

Bets on draws can truly be a great chance.

Consider that, however, despite our analyzes it may happen that you are unable to predict even a correct tie among those indicated. This is part of the game.

However, it has happened very very rarely.

Our site does not guarantee winning, you have to be constant in betting on draws and be lucky. Many games, for example, have ended for example 4-4 or 3-

3 or are lost in the final.

We are committed to selecting those with great chances of success.
